Eric Abraham D. Zamora Jr.
396, Saint Joseph St. Hipodromo, Cebu City
Cellphone no. 09330229148
Email: zamora.ericjr@gmail.com

PROFILE:

I am an industrious developer who is willing to learn and is very trainable with less supervision. Currently I have acquired the basic skills (HTML, JavaScript, CSS, API database, etc.) to develop a full stack website but it is not enough for me to just learn the basic it is my aim to Enhance my skills in developing applications and websites and learn more on anything related to computer programming in an effort to contribute in process-efficiency and create/develop more novel/ innovative applications/ programs that would impact change. To be able to practice my analytical skill and develop it further in solving problems that require in-depth analysis.

PROJECTS:

Kodego – Capston project Full-Stack web development (StartUps)
(Jan 8, 2024 - Jan 22, 2024)
- This is my capstone project that has both frontend and backend. It is for Innovators who has ideas but has no financial capabilities to have their idea reach the market or be operational.
- Tools used: Visual Studio, Tailwind, React, JavaScript, API, MongoDb, Firebase, local Storage
- Developed the overall structure of the platform from front-end, back-end, logic, etc.

Kodego – MiniProject 2 Frontend Web development (Airbnb clone)
(Nov 1, 2023 - Nov 25, 2023)
- Airbnb clone is our mini project 2
- Tools used: Visual Studio, Tailwind, React, JavaScript, local storage, redux
- Developed the front-end of the project to clone the look and functionality of Airbnb

Kodego-Calculator project
(Oct 5, 2023 - Oct 7, 2023)
- This is a calculator website
- Tools used: Visual Studio, JavaScript, CSS, HTML
- Code the logical/ operation of a calculator such that it works as a fully functional calculator

Kodego – My-tasks project
(Sept 25, 2023 - Oct 2, 2023)
- This is a "to-do-list" website. This is my second project in my bootcamp Kodego. You can check it in this link https://zamoraericjr.github.io/myTask/
- Tools used: Visual Studio, Bootstrap, HTML, CSS
- This is an individual front-end project hence I developed the website alone and for me it the best among our class

Kodego – MiniProject 1 HTML and CSS Web development - Webdd.com
(Sept 11, 2023 – Sept 23, 2023)
- This is my first project in my bootcamp Kodego. You can check this in this link https://zamoraericjr.github.io/webdd.com/
- Tools used: Visual Studio, Bootstrap, HTML, CSS
- This is an individual front-end project hence I developed the website alone

mettobetting.com
(Jan 2022 – Feb 2022)
- This is the website of Metto where the Metto and Metto-Agent mobile applications can be dowloaded and installed in Android phones and where the events bettings updates (events for betting, results of events, dates when the events will be opened and closed, etc.) are posted regularly.
- Tools used: Wordpress

Metto Agent
(2022)
- This is the Android mobile application that works on the promotion and marketing of Metto where the users of this Android application earns a percentage or a certain amount of money from the bets of their player/s.
- Tools used: Android Studio, JavaScript, Firebase

Metto applications for operations
(2022)
- These applications are for the opearation part of the Metto company which includes but not limited to applications for the admin, applications for the Accounting, and other responsive apps necessary to keep the end-users' Metto mobile application functional.
- Tools used: Android Studio, JavaScript, Firebase

Metto
(2021)
- A mobile application for Android phones that allows users to play instant betting games like Jack-en-poy betting, Raffle betting, and Events betting. You can download the apk using your android phone at www.mettobetting.com.
- Tools used: Android Studio, JavaScript, Firebase
